

On-site seminars and training

Written by Kamoutsi Eleni

Wednesday, 29 December 2010 19:41 - Last Updated Wednesday, 16 March 2011 21:56

LoM offers on-site specialized seminars on the technology of metallic materials to employees of interested industries and businesses. The topics include:

- Metallurgy for the non-metallurgist

- Failure analysis: techniques and case studies

- Introduction to Welding technology

- Aluminum Technology

- Corrosion and Prevention

- Mechanical behavior of materials

- Steel technology

All the above seminars are given in the business premises. The duration is two days.
